Updating Scientific Workshops

The European Angiology Days are organized yearly :

1) Aims

- to offer a high level of updating on one topic integrating clinical and research aspects.
- to divulge information on the progress of the European educational and research projects proposed by VAS.
- to debate with colleagues from other specialities on a theme with a multidisciplinary approach to arrive at the layout of guidelines

2) The workshops will focus on a different topic each year, both with lessons and identifying the main issues for contributions and discussions

3) The topics are selected by the European Angiology Days Scientific Committee from the proposals received. These proposals should arrive at the VAS Head Office by December each year.

4) Each year during the EAD's a meeting with the patients is organised "Questions for the Experts". Here European specialists answer the patients' questions (simultaneous translation)

5) Each year a session will be dedicated to a "Multidisciplinary Joint Section " with one or more Scientific Societies/Associations on a topic of common interest to arrive at a written agreement to be published.
